CERTIFICATION STATEMENTS:

1. The United States is free of foot-and-mouth disease, goat and sheep pox, peste des petits ruminants, and Rift Valley fever.
2. Scrapie is a notifiable disease in the United States and the feeding to sheep and goats of meat-and-bone meal or greaves of ruminant origin is been banned and effectively enforced in the United States.
3. Each animal was identified by a permanent identification system recognized by the USDA.
4. The animals have been in isolation in facilities approved by a USDA-accredited veterinarian, for a minimum of 30 days prior to embarkation and examined for clinical signs of disease including caprine arthritis/ encephalitis or maedi-visna, paratuberculosis, bluetongue, and brucellosis.
5. The flock(s) of origin:
 - a. Has had no clinical cases of scrapie disease in the last seven (7) years prior to export.
 - b. Has had no clinical cases of caprine arthritis/encephalitis and/or maedi-visna in the last three (3) years prior to export.
 - c. Has had no clinical cases of brucellosis in the last twelve (12) months prior to export.
6. The animals were treated against potential bluetongue insect vectors with long acting insect repellents approved for use in the United States, and following manufacturers' recommendations, for the duration of protection during the entire length of the isolation, through the time of export, with no lapse in protection coverage.

TEST REQUIREMENTS:

All animals must be tested during the 30 day isolation period, with negative results as prescribed below:

1. Tuberculosis:
Test Type & Date: _____
2. Brucellosis (*B. abortus*):
Test Type & Date: _____
3. Bluetongue:
AGID (Agar-gel immunodiffusion)* test or ELISA* or PCR.
Date: _____

*Animals that test positive on AGID or ELISA may be further tested by either PCR or virus isolation conducted at the USDA-National Veterinary Services Laboratories (NVSL). A negative PCR or virus isolation test will override a positive ELISA or AGID and animals will be released for export based on these negative results.
4. Paratuberculosis:
Test Type & Date: _____
5. Maedi-visna (**for sheep over one year of age**):
Test Type & Date: _____
6. Caprine Arthritis Encephalitis (**for goats over one year of age**):
Test Type & Date: _____

EMBARKATION STATEMENTS:

1. During transit, animals will not be comingled with any animals of lesser health status.
2. The loading of the animals was carried out in vehicles or containers previously cleaned and disinfected using an approved disinfectant.
3. The animals will receive USDA veterinary inspection within 48 hours of export, and only those animals found free of evidence of communicable disease and fit to travel will be permitted for export.
