APHIS Releases Free Save Our Citrus iPhone App

APHIS' new Save Our Citrus iPhone app is ready to download! The free app makes it easy to identify and report the four leading citrus diseases: citrus greening, citrus canker, citrus black spot and sweet orange scab.

Make sure your citrus is healthy and help stop the spread of these incredibly destructive citrus diseases. Report suspicious citrus symptoms or upload a photo, and you'll receive an individual response back from our citrus experts. The app, in English and Spanish, is available as a free download on iPhone, iPad and iPod touch mobile devices. Visit the Save Our Citrus [app page](#) for more information.

To save our citrus, we need to work together. That means knowing the facts about citrus diseases and getting the word out to others. To learn more about APHIS' Save our Citrus Campaign, visit saveourcitrus.org or like Save Our Citrus on Facebook.
