

## Summary of Studies Supporting USDA Product Licensure

Establishment Name	Intervet Inc.
USDA Vet Biologics Establishment Number	165A
Product Code	16N1.R0
True Name	Marek's Disease-Newcastle Disease Vaccine, Serotype 3, Live Marek's Disease Vector
Tradename(s) / Distributor or Subsidiary (if different from manufacturer)	Innofusion-ND - Intervet Columbia Ltda Innovax ND - Merck Animal Health Innovax ND - No distributor specified Merck Animal Health Merck Sharpe and Dohme (MSD)
Date of Compilation Summary	October 25, 2021

**Disclaimer: Do not use the following studies to compare one product to another. Slight differences in study design and execution can render the comparisons meaningless.**

<b>Study Type</b>	Efficacy
<b>Pertaining to</b>	ALL
<b>Study Purpose</b>	To demonstrate effectiveness against disease caused by Marek's Disease Virus (MDV) and Newcastle Disease Virus (NDV)
<b>Product Administration</b>	<i>In ovo</i>
<b>Study Animals</b>	Chickens
<b>Challenge Description</b>	
<b>Interval observed after challenge</b>	
<b>Results</b>	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
<b>USDA Approval Date</b>	March 11, 2004

<b>Study Type</b>	Efficacy
<b>Pertaining to</b>	Marek's Disease Virus (MDV)
<b>Study Purpose</b>	To demonstrate effectiveness against disease caused by Marek's Disease Virus
<b>Product Administration</b>	One dose administered <i>in ovo</i> at 18 days of embryonation.
<b>Study Animals</b>	Group 2: 35 embryos, vaccine treatment Group 3A: 35 Challenged Placebo controls Group 4: 25 Non-challenged Placebo controls
<b>Challenge Description</b>	Challenged with MDV, GA5 strain challenge virus at 5 days of age.
<b>Interval observed after challenge</b>	Observed for clinical signs through 49 days of age. All birds were necropsied at the end of the observation period.
<b>Results</b>	<p>Summary of results:</p> <p>Birds positive for Marek's Disease:</p> <p>Vaccinates (Group 2): 3/34*  Positive Controls (Group 3A): 32/34  Negative Controls (Group 4): 0/24</p> <p>*One chicken died from causes unrelated to challenge and was not included in the analysis.</p> <p>Requirements per 9 CFR 113.330(c) were met.</p> <p>Raw data attached</p>
<b>USDA Approval Date</b>	May 20, 2010

<b>Study Type</b>	Efficacy
<b>Pertaining to</b>	Marek's Disease Virus (MDV) and Newcastle Disease Virus (NDV)
<b>Study Purpose</b>	To demonstrate effectiveness against disease caused by MDV and NDV
<b>Product Administration</b>	One dose administered by the subcutaneous route at 1 day of age.
<b>Study Animals</b>	Group 2A: 35 chickens, MDV vaccine treatment Group 2B: 32 chickens, NDV vaccine treatment Group 3: 35 non-vaccinated MDV positive controls Group 4: 12 non-vaccinated NDV positive controls Group 5: 25 non-vaccinated, non-challenged MDV negative controls
<b>Challenge Description</b>	Groups 2A and 3: Challenged with MDV challenge virus at 5 days of age Groups 2B and 4: Challenged with NDV challenge virus, Texas GB Strain, at 28 days of age
<b>Interval observed after challenge</b>	Observed for clinical signs of MDV through 49 days of age. All birds were necropsied at the end of the observation period. Observed for clinical signs of NDV through 42 days of age.
<b>Results</b>	<p>Summary of results:</p> <p>Birds positive for Marek's Disease:</p> <p>Group 2A Vaccinates: 2/35 Group 3 Positive Controls: 33/34* Group 5 Negative Controls: 0/25 *One chicken died from causes unrelated to challenge and was removed from analysis.</p> <p>Requirements per 9 CFR 113.330(c) were met.</p> <p>Birds positive for Newcastle Disease:</p> <p>Group 2B Vaccinates: 0/32 Group 4 Positive Controls: 12/12</p> <p>Requirements per 9 CFR 113.329 were met.</p> <p>Raw data attached.</p>
<b>USDA Approval Date</b>	June 16, 2009

<b>Study Type</b>	Efficacy														
<b>Pertaining to</b>	Newcastle disease virus (NDV)														
<b>Study Purpose</b>	To demonstrate efficacy against NDV 60 weeks after vaccination														
<b>Product Administration</b>	Subcutaneous														
<b>Study Animals</b>	34 specific-pathogen-free chickens at day-of-age, 22 vaccines and 12 placebo controls														
<b>Challenge Description</b>	Challenged with NDV at 60 weeks post-vaccination														
<b>Interval observed after challenge</b>	Observed for clinical signs for 14 days post-challenge														
<b>Results</b>	<p>Summary of results:</p> <table border="1"> <thead> <tr> <th rowspan="2">NDV CHALLENGE</th> <th colspan="4">Treatment Group</th> </tr> <tr> <th>Vaccinates</th> <th>Placebos</th> <th>Number positive/total</th> <th>Percent Protection</th> </tr> </thead> <tbody> <tr> <td>60 weeks</td> <td>1/22</td> <td>95</td> <td>12/12</td> <td>0</td> </tr> </tbody> </table> <p>Requirements per 9 CFR 113.329 were met.</p> <p>Raw data attached.</p>	NDV CHALLENGE	Treatment Group				Vaccinates	Placebos	Number positive/total	Percent Protection	60 weeks	1/22	95	12/12	0

<b>Study Type</b>	Safety																																				
<b>Pertaining to</b>	ALL																																				
<b>Study Purpose</b>	To demonstrate safety of product under typical field conditions																																				
<b>Product Administration</b>	One dose was administered by the subcutaneous route to 1-day old chickens.																																				
<b>Study Animals</b>	A total of 333,196 broiler and layer chickens, representing 3 distinct geographical locations.																																				
<b>Challenge Description</b>	N/A																																				
<b>Interval observed after challenge</b>	Layer chickens (Site 1 and 2) were observed daily for mortality through 8 weeks of age. Broiler chickens (Site 3) were observed until harvest.
