Country

2. Consignee in the United States:

Name  
Address  
Country

3. Country Of Origin/ISO code:

4. State Of Origin:

5. Premise/Farm of Origin:

Name  
Address

6. Port Of Embarkation/ Entry Point/ Border Port:

7. Estimated Date Of Shipment:

8. Means Of Transport:

9. Place of Destination:

10. Description: \*Registered Name/Breed/Color/Sex/Distinctive Markings:

\*Clear identifications must accompany this certificate: photographs, microchip, and/or a silhouette indicating markings. A passport identifying the horse may be attached to this certificate provided that the passport number is included.

Veterinary Authority	Date Of Issue	Certificate Number
----------------------	---------------	--------------------

This is to certify that on \_\_\_\_\_(date) I examined the horse identified above:

The horse \_\_\_\_\_was in the country of export for the last 60 days immediately preceding exportation to the United States. If residing in the country for less than 60 days the horse is accompanied by a health certificate issued by a full-time salaried veterinary officer of the National Government of each country in which the horse has been during the 60 days immediately preceding shipment to the United States, with the residency dates in each country specified.

Has been inspected and found to be free of and not exposed to any infectious or contagious diseases immediately preceding exportation, or if applicable, during the indicated period of residency in any of the countries listed.

Has not been vaccinated with a live, attenuated or inactivated vaccine during the fourteen (14) days immediately preceding exportation.

Has not been on premises where African horse sickness, dourine, glanders, surra, epizootic lymphangitis, ulcerative lymphangitis, equine piroplasmiasis, equine infectious anemia, contagious equine metritis, vesicular stomatitis, or Venezuelan equine encephalomyelitis has occurred during the sixty (60) days immediately preceding exportation, nor have these diseases occurred on any adjoining premises during the same period of time.

Has been examined and found to be free of ectoparasites.

Examination and treatment for screwworm:

1. A veterinarian must treat horses with ivermectin 3 to 5 days prior to the date of export to the United States according to the recommended dose prescribed on the product's label.
2. Horses must be examined for screwworm by a full-time salaried veterinary official of the exporting country within 24 hours prior to shipment to the United States. The official must fully examine the horses, including their external genitalia. If horses are found to be infested with screwworm, they must be treated until free from infestation.
3. At the time horses are loaded onto a means of conveyance for export, a veterinarian must treat any visible wounds on the animals with a solution of coumaphos dust at a concentration of 5 percent active ingredient.
4. Horses must be accompanied to the United States by a certificate signed by a full-time salaried veterinary official of the exporting country. The certificate must state that the horses, including their external genitalia, have been thoroughly examined and found free of screwworm. Horses must be examined by a veterinarian at the expense of the owner or broker. For this examination, male horses must be tranquilized or sedated so that the external genitalia of the horses can be thoroughly examined.
